In the event that a student challenged an AP exam in which he/she was not enrolled in the course and received a qualifying score of a 3, 4, or 5, he/she shall receive the weight added to the equivalent course within that discipline based on this chart, if taken by the end of the seventh semester (fall semester of senior year). If there is no equivalent course taken within that discipline by the end of the seventh semester, then no additional points will be added. The grade earned in the course must be 70 or better before points will be added by the fall term of the next school year. Once the points have been recorded to an AP equivalent course they cannot be transferred or recorded to any past or future equivalent AP course.
