	Athletics/Band/Other Elective(s)		

TVCC Welding Certificate

Extra-Curricular Disclaimer

Please note that welding classes are offered from 1st through 7th periods each day. Due to scheduling limitations, it will not be possible to remain in any mainstream extra-curricular activity throughout all four years of high school and graduate with a TVCC welding certificate unless the student takes classes during the summer directly through TVCC.

******* IMPORTANT *******

Please note that this plan is a framework. Each student will need an individualized plan in order to receive a diploma from EHS and a Welding Certificate from TVCC. EHS counselors will provide general guidance about the Welding Certificate, however their focus will be on the student receiving their high school diploma. Students seeking a Welding Certificate may need to seek guidance through services provided by TVCC.
