

## Survey Results of 4 Day School Week

In recent weeks, the Winfield R-IV Board of Education requested that parents and staff members complete a survey to garner feedback as to the support for moving to a 4 Day School Week. 769 surveys were completed with 56% of those who completed the survey showing favor for moving to a 4 Day School Week. Discussion was held among the board in regard to the number of surveys completed being a low fraction of the parent and staff members eligible to complete the survey as over 2,200 parents and staff members were eligible to complete the survey. The board expressed concern that there were not enough responses to the survey to capture an accurate representation of stakeholder opinion to make a decision at that time. In addition, over 1100 responses were provided by those who completed the survey identifying stakeholder opinions as to the positive and negative impacts a 4 Day School Week would have for our students, parents, school district, and community. The Winfield R-IV Board of Education examined the results of the survey and held lengthy discussion during the March Board of Education meeting. District administrators provided input to the Board of Education offering concern for our staff members' ability to adequately prepare new lesson plans and change the scope and sequence of curriculum over the summer to implement a 4 Day School Week for the upcoming year. The Board of Education carefully weighed out the pros versus cons of such a calendar change and identified that the benefits of a 4 Day School Week were outweighed by the negative impacts to students and staff. The Winfield R-IV Board of Education ultimately determined that the positive data related to moving to a 4 Day School Week was not significant enough to move forward at this time. The results of the survey are as follows:
