### District Internet and E-Mail Access and Expectations

The Internet is a vast global computer network. The Vermilion Parish School District offers Internet access to all students. For the safety of our students we use a content filtering system which monitors and restricts network and Internet activity as prescribed by federal law. Users should not expect email, files, or any Internet use to be private. The network is provided to enhance students' educational experiences and help prepare them for the 21<sup>st</sup> Century. Access to network services is given to students who agree to act in a considerate and responsible manner. Parental permission is required. Access is a privilege - not a right. Individual users of the district's computer networks are responsible for their behavior and communications over those networks. It is expected that users will comply with all district rules and regulations and will honor the agreements they have signed.

### User Responsibilities

Users of the Vermilion Parish Network must conduct themselves in accordance to all school and district policies and rules as outlined in the Student/Parent Handbook. In keeping with these policies and rules, **the following are NOT allowed:**

- Attempting to bypass the monitoring, filtering, or security system
- Revealing personal information about yourself or other people
- Sending or displaying offensive messages or pictures
- Using obscene, profane, lewd, vulgar, rude, threatening or disrespectful language
- Harassing, insulting or attacking others
- Intentionally accessing material which is inappropriate for school settings
- Damaging computers, computer systems or computer networks
- Violating copyright laws
- Using another's password or allowing others to use your password
- Trespassing in another's folders, work or files or any restricted area
- Accessing or using non-educational network resources which effects the educational use of others (i.e. downloading large non-educational files or videos, playing video games, etc)
- Employing the network for commercial purposes

### Violations may result in a loss of access as well as other disciplinary or legal action.

We have read this Internet and Network User Agreement and the Acceptable Use Policy of the Vermilion Parish School Board. We are fully aware of the guidelines, rules, and responsibilities for the use of school computers, network, and the Internet. We understand that individuals and families may be held liable for violations of this agreement or the Acceptable Use Policy..
