

# Turn your **PASSION** into a **PAYCHECK** GO GREEN!

## OUR PROGRAMS:

### CNC Machining

Machining is used in many facets of manufacturing. Innovative machine tools are essential to modern manufacturing and effect nearly everything in today's society. There are many good paying careers in this region sought by highly skilled, motivated individuals with excellent opportunities for advancement.

### Construction Trades

Residential and commercial carpentry, electricity, and plumbing are the focus of this program. Skills learned include building a house from the ground up, framing, electrical, plumbing, drywall, and cabinets and trim to get you career ready upon completion.

### Cosmetology

We provide you with the practical skills you will need in this industry. Some of those include; hair cutting, coloring, chemical texture services, skin and nail care, along with step by step instruction on how pass your state board exam and obtain your cosmetology license.

### HVAC Technician

The HVAC class is designed to prepare students for entry level positions in the HVAC industry as installation or technician apprentices. In this program students learn safety, basic electricity wiring and circuits, brazing, heat transfers theory, air conditioning and heating operations and heat pump operation.

### Health Careers Certification

Learn the basic skills to build and support the foundation needed for a career in the Health Care field. We do that by providing the opportunity to learn and become a Certified Long-Term Care Nurse Aide. In addition to learning the skills for the healthcare field, you also get the opportunity to learn and receive high school credit for Anatomy.

### Medical Assisting

Medical Assisting students are given the opportunity to learn how to perform administrative and clinical procedures in the ambulatory healthcare setting. Healthcare is versatile these days and patients want to be greeted and taken care of by competent, compassionate, and caring medical assistants.

### Practical Nursing

The LPN Program is a great opportunity to start a career in the nursing profession. Skills learned include assessments, IV skills, phlebotomy, wound care, and medication administration. Students leave this program prepared to take their Practical Nursing state board exam.

*Adults only*

### Programming & Video Game Development

Students learn how to create, monetize, and publish video games, from scratch, using the Unity Engine. By the end of the program students are prepared to take the Unity Certified Associate: Programmer and Game Developer industry exams.

### Welding

Students learn multiple welding processes including Mig, Tig, Stick, and Flux Core welding on plate and pipe in various positions and processes. Students work towards obtaining State Weld Certifications, also known as the steam card.

## WHY CHOOSE US?

We develop a world-class workforce by preparing YOU for success through specialized training.
