Other Health Impairment

Other health impairment. A student with other health impairment is one who has been determined to meet the criteria for other health impairment due to chronic or acute health problems such as asthma, attention deficit disorder or attention deficit hyperactivity disorder, diabetes, epilepsy, a heart condition, hemophilia, lead poisoning, leukemia, nephritis, rheumatic fever, sickle cell anemia, and Tourette's Disorder. The multidisciplinary team that collects or reviews evaluation data in connection with the determination of a student's eligibility based on other health impairment must include a licensed physician.

The district assessment professional will work closely with the parent to obtain an eligibility document signed by the physician. A "Release of Confidential Information" form will be obtained from the parent and the eligibility form will be sent directly to the physician by the district. If the child does not have a licensed physician, the district assessment professional will follow the district procedures for obtaining contract services.

Evidence of Practice:

- Full and Individual Evaluations
- Eligibility Statements
- Medical Diagnosis
- Notice of ARD committee meetings
- Copies of ARD committee meetings
- LEA submissions of SPP 7, 11 and 12 through TEAL
