Allowing 3rd Party Cookies in Google Admin Console

1. Log in to your Google Admin Console.
2. Open the Devices module.
3. Select Chrome Management from the left-side menu.
4. Select “User & browser settings” from the menu below.
5. [Optional] The default OU chosen at the beginning is your root level. If you want to only apply this setting to a select group of users, choose the OU from the left-side menu that contains the users to apply this setting to.
6. Scroll down, about half-way, on the settings page to you get to the Content settings category. You can also add a filter on the Category for Content to only show the content settings category, by using the “Search or add a filter” option in the heading.
7. The first setting in this area that needs to be changed is the “Cookies” setting.
   A. Type the following URLs under the “Allow cookies for URL patterns”
      - [*.]instructure.com
      - [*.]coursearc.com

8. The last setting in this area that needs to be changed is “Third Party Cookie blocking”
   A. From the drop-down box, select the option “Allow third-party cookies”
