Minutes for SHAC Meeting  
October 24, 2022

Meeting was called to order by Dr. Stout at 4:00 pm.

-Dr. Stout updated everyone on the status of the ISD’s Wellness Plan. He explained that it is still being updated by himself and the food services department. Once it is complete, he will bring to the board for us to look over and approve.

-Then Dr. Stout discussed the need for a Vape Awareness Program. We need a prevention program that will bring awareness to the kids about the dangers and health risks of vaping; it has become a real problem! He reports that a lot of his DAEP students are there because they were caught vaping and he would like a program for them to utilize while they are in DAEP. He has two options; One being “Say What” and the other being “Catch My Breath.” Literature about both is available to us so we can become familiar with them.

**Our homework is to read up on these programs and become familiar with them before the next meeting so we can choose one.

-Next Dr. Stout gave a grant update about various grants he is trying to get for the schools; they are listed below.
  -5 refrigerators for nurses across all campuses and DAEP.
  -Covid testing $ from the State; we need more covid tests on hand on the school. There was a dispute on the number of tests we had administered previously. We got that figured out; the application will be corrected and resubmitted so we can get the tests asap.
  -Grant for laptops for nurses and may be able to get disinfecting equipment for all campuses.
  -Cyber Security Grant.

Items for discussion at our next meeting:
-Discuss the two options for Vape Awareness Program and go over any other ones that any in attendance may have found. Vote and choose one to start using.
-Review Wellness Plan if it is complete at this time.

Next meeting will be the week of November 14th; exact date and time are yet TBD.

Meeting adjourned at 4:15pm.
