

A student who drives a vehicle to school must have it registered in the school office and purchase a school parking permit to display in a designated area on the vehicle. Parking permits can be obtained in the principal's office. Each vehicle a student drives to school must have a parking permit unless temporary arrangements are made with the principal ahead of time to park the vehicle on the lot.

Any student who drives or parks a vehicle on school property is deemed to consent to a search of that vehicle at any time and is required to open the vehicle for such a search. Refusal by the student to open the vehicle while on school property may be grounds for discipline, including suspension and/or loss of parking privileges.

Each student must have a valid driver's license before a parking permit will be issued.

Parking is a privilege, and any unsafe operation or violations may result in revocation of parking privileges.
