

# Venn Perplexors

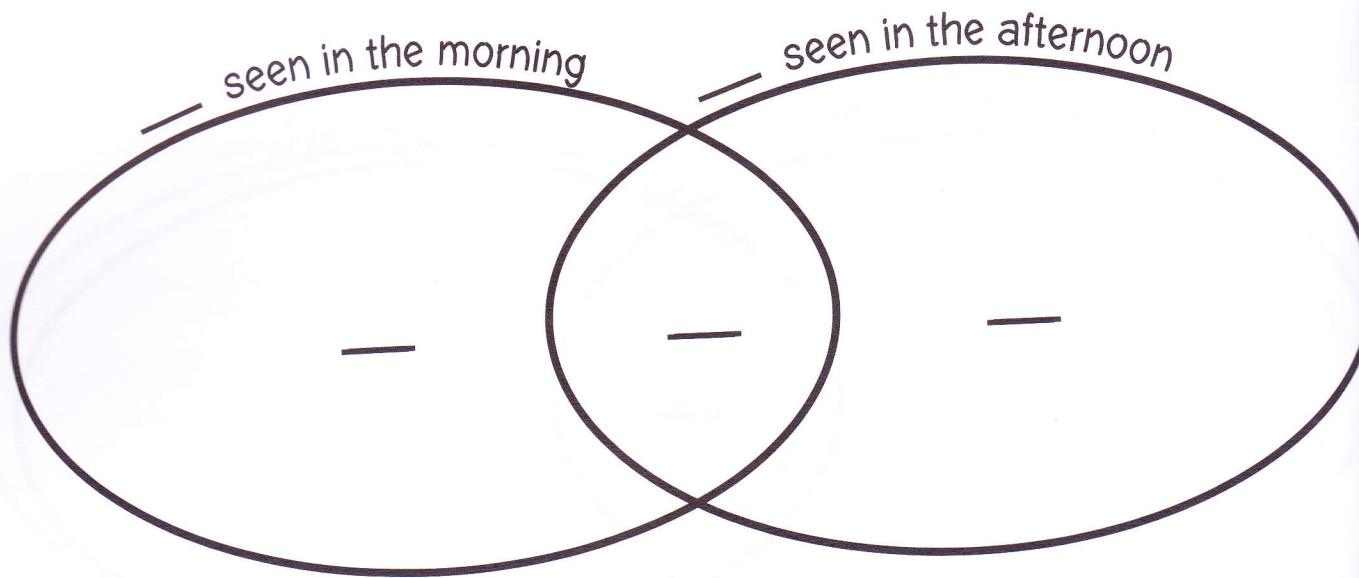

## The Story

A human boy named Stephen lives in a house whose backyard borders the wooded area where the 48 aliens landed. One morning Stephen sees 27 of the strange-looking creatures playing in his backyard. In the afternoon he sees 34 of the creatures.

## Puzzle

#4

— aliens

?

If there are only 5 of the aliens that Stephen doesn't see, how many of the creatures that he sees in the afternoon are not the identical creatures that he saw in the morning? —
