

Venn Perplexors

The Story

Stephen wants to learn to communicate with the aliens so he spends lots of time with them. For a week he spends at least some time with them every day. The number of days he spends time with them after noon is one more than the number he spends time with them before noon. The number of days he spends time with them only before noon is half as many as the number he spends time with them only after noon.

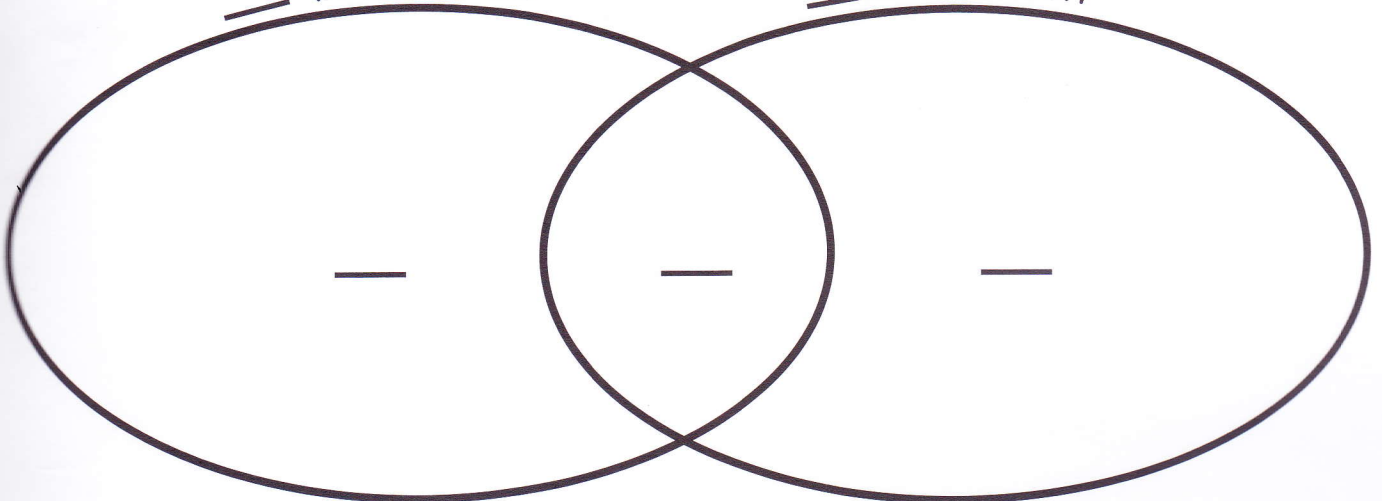

Puzzle

#7

— days

— before noon

— after noon

?

How many days does he spend time with the aliens both before and after noon? _____
