Canute, OK 73626

Hello interested Donor/Sponsor! My name is Brian Morris, I am the Technology Director of Canute Public Schools. I am also the Robotics Instructor as well. Our school district is currently trying to procure a curriculum that involves Robotics/STEM for our students to further their educational opportunities in Science, Technology, Engineering, and Mathematics. In order to do this we are wanting to start up a Robotics Competitive Team for our Freshman through Senior Grades and if successful move it to our Elementary/Middle School Grades as well.

Our current goal to hit as far as donations and/or fundraising is \$3,000.00. This will provide our school district with enough money to purchase a Competition Robotics kit from VEX Robotics and a Competition Field from VEX Robotics so that we can train, program, create, build, and learn. This also includes the Robotics programming language as well as the curriculum needed for our students to be successful in the classroom.

We hope that this motivates you as much as it does us! We are beyond excited at the opportunity to offer this class to our students and show them a world that is currently developing using Robotics. Any donations/sponsorships will be strictly used for our Robotics Program. When our shirts are created you will also receive a spot on the shirt as well as recognition on our brand new school website. www.canuteschools.com We want to thank you in advance for helping us out!

Again thank you so much!

Brian A. Morris
Director of Technology
