

Catoosa Public Schools will be communicating transportation updates using the Remind Application. Remind will allow us to notify you in the event your student's bus is running late or ice routes are required. Remind will make it possible for us to communicate specifically with those affected by the change.

The main phone number and email in our student information system has been set up to receive the communication. If you prefer, you can download the Remind Application to manage this communication. If not, you will receive regular text messages and/or emails.

A test message will be sent out on Tuesday morning. If you do not receive the message by noon, please call Debbie Frame at 918-266-8603.

Communication is very important to us and we now have a system in place to help. If you have questions email Brad Taylor, transportation director at btaylor05@catoosa.k12.ok.us
