

Honors Chemistry Summer Work

Hello and welcome!

You've signed up to take Honors Chemistry next year. I am Dr. Munrow and I will be your teacher. Please join the Honors Chemistry Summer Work Google Classroom. There you will find your actual assignment. The code is: 4w2ytcu

We will continue to work with Next Generation Science Standards (NGSS) next year. One of the important skills to have is being able to model phenomena.

Effective modeling includes:

1. Using pictures (not sentences, phrases or paragraphs) to explain what you can see with your eyes.
2. Using zoom-in boxes to show what is happening on a smaller scale (like with atoms and molecules)
3. Using shapes and symbols to represent atoms/molecules (when you don't know what they actually are)
4. Using keywords or labels only when necessary.

Your summer work will be due the first class after Labor Day weekend. If you have any questions, please feel free to contact me at: munrowm@norwalkps.org Please be advised that I will only periodically be checking my email throughout the summer. It's best to continue working on your models while you wait for a reply (but I will get back to you!)

I can't wait to meet all of you next year!
