

Referral Process

At any time that a student continues to struggle with one or more components of reading, North Lamar ISD will collect additional information about the student. The information will be used to evaluate the student's academic progress and determine what actions are needed to ensure the student's improved academic performance. Information to be considered includes the results from some or all of the following:

- Vision screening
- Hearing screening
- Teacher reports of classroom concerns
- Benchmark reading assessment
- Accommodations provided by classroom teachers
- Academic progress reports and/or report cards
- Samples of school work
- Parent conferences
- Testing for limited English proficiency
- Speech and language screening through a referral process
- The K-3 reading instrument as described in TEC §28.006
- State student assessment program as described in TEC §39.002

Among the actions that North Lamar ISD has available for the student is a recommendation that the student be assessed for dyslexia. North Lamar ISD recommends assessment for dyslexia if the student demonstrates the following:

- Poor performance in one or more areas of reading and/or the related area of spelling that is unexpected for the student's age/grade, and;
- Characteristics of dyslexia.

Primary Reading/Spelling Characteristics of Dyslexia:

- Difficulty reading real words in isolation
- Difficulty accurately decoding nonsense words
- Slow, inaccurate, or labored oral reading (lack of reading fluency)
- Difficulty with learning to spell

The reading/spelling characteristics are the result of difficulty with the following:

- The development of phonological awareness, including segmenting, blending, and manipulating sounds in words
- Learning the names of letters and their associated sounds
- Phonological memory (holding information about sounds and words in memory)
- Rapid naming of familiar objects, colors, or letters of the alphabet

Secondary consequences of dyslexia may include the following:

- Variable difficulty with aspects of reading comprehension
- Variable difficulty with aspects of written composition
- A limited amount of time spent in reading activities

The Response to Intervention (RtI) committee, which should include members with knowledge about dyslexia, will evaluate the collected data and make a recommendation for further assessment when these criteria are met.
