

VIRTUAL CLINICS IN SCHOOLS

Bringing the Right Care to Our School

Several health conditions can be treated through our Virtual Clinic without your child leaving school. These include, but aren't limited to:

- Bug bite
- Congestion
- Ear infection
- Head lice
- Minor injuries
- Pinkeye
- Rash or skin irritation
- Sinus infection
- Stomach flu
- Strep throat

We've partnered with CoxHealth to bring a Virtual Clinic to our school. With Virtual Clinics in Schools, your child has access to great health care without leaving campus when they get sick during school hours.

During your child's visit, they'll meet with a licensed physician or nurse practitioner using state-of-the-art video conferencing equipment at school. If you can't be with them during the visit, you can join the conference using your mobile device, minimizing disruptions to your daily schedule.

To participate, complete the Consent to Treat form and return it to the nurse's office or your child's homeroom teacher.
