Looking for a Customized PD option?
Our team of highly qualified educators can develop a CUSTOMIZED PROFESSIONAL DEVELOPMENT plan for your short or long-term needs with a variety of learning options for your staff!
EdPlus delivers high quality professional development on relevant topics providing strategies and tools to enhance student learning. From customized, in-person, virtual or on demand, we offer workshops, conferences and short sessions to support the needs of all staff in our school districts. We take pride in the positive feedback that we consistently receive about our PD.

“Great job!! Our team is fired up in large part to the training provided this week!!”

“The presentation was excellent and I love the way that the presenter kept us engaged with hands-on activities.”

“Wonderful presentation! Best PD of my school year so far. Clear vision, ease of implementation, and benefits of student achievement!”

“This is the kind of PD we love! I love leaving a session feeling excited to try some new things in my classroom. It was short, clear and to the point, and left me feeling confident I can try this successfully.”

“It was a great presentation, to the point, and full of good information. Thanks!”

“The presenters were extremely knowledgeable demonstrated by their ability to provide recommendations on the spot and flex the presentation to meet the needs of the participants.”

“The sessions on De-Escalating are very valuable tools for all teachers to have in their tool box. I will definitely encourage my administrator to consider having the staff go through this PD training.”

“It went by quickly and I felt like I can take it back and do right away. Thank you.”

“I did not know that the ISTE work would tie in so much with everything I learned by teaching at a Personalized Learning (PL) school. I hope to continue to learn and be inspired.”

“The trainers were knowledgeable and approachable. This cohort seems very collaborative and support and there are structures in place for us to connect and support each other.”

“The ISTE training so far has taught me to change my mindset. Instead of limiting technology out of fear that students will misuse it, I should instead have the mindset of teaching students how to integrate technology appropriately in their education and life. By shifting focus, technology becomes a tool and student mistakes become a teaching experience.”

“I liked the range of topics! I felt it was applicable for any grade/teacher. I was extremely impressed.”

“I was very inspired by the keynote speakers and have been so excited to try out some new strategies with students.”

“I felt that the sessions were worthwhile with concrete examples of what I can do to help my EL students succeed in the classroom.”

“It was simply amazing. I’ve been an EL specialist for 15 yrs and learned so much.”

“This was one of the best conferences I have attended! The presenters were well informed and offered us so much useful information!”

“The METC conference never disappoints! I always get so much that I can take back to my classroom and school!”

“I really enjoyed my time at this conference. I was presented with new tools and strategies that I can take back to my classroom.”

“This was fantastic! I have never been so excited to implement something from a PD!”

“This was a wonderful session that helped me see design thinking in a new way.”

“I will be able to use this content immediately in my practice. Thank you!”

“Wonderful sessions with great examples and strategies for teachers! Excellent presenters!”

“This was relevant, needed, helpful, and contained information that we can use daily. (at home and in our careers). The context included everyone, and had an underlying focus on self-awareness.”

“This session was packed with helpful tips. I enjoyed it immensely.”

“SO GOOD! I didn’t think I’d really get anything out of this, but I was so excited after the morning session that I immediately reminded 3 other people to get on the afternoon session. Then I went and tested out some of what I learned.”

“Good learning opportunity from every participant.”
