

School Level Improvement Plan

When developing the 2022-2023 SLIP, HSSD Schools used measured accountability areas to develop goals that will promote the three focuses in our district: **Capturing Kids Hearts, Professional Learning Communities and High Reliability Schools**. The ESSA School Index Areas of Weighted Achievement, Value-Added Growth, SQSS, & Graduation Rate (if applicable), were also considered in developing plans that are strengthened with embedded professional development, adequate timelines and measurable goals. *Please address the needs of your campus through all lens; i.e. students with disabilities, ESOL, 504, etc.*
