TMSCA State Competition

Congratulations to all the middle school students that competed in the TMSCA academic meets this school year. After several rounds of competition, we had seven students that qualified for the state TMSCA competition that was held on April 21 at U. T San Antonio. Our state level participants included:

Parker Martinka-8th

Alex Smith-8th

Reagan Carr-7th

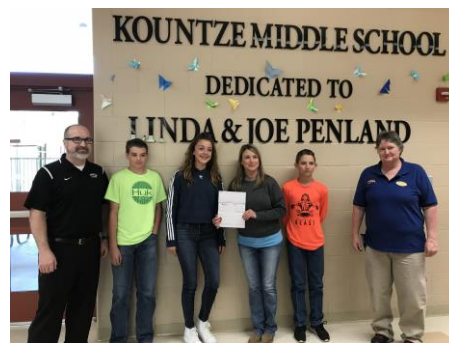

Dinah Coker-7th

Zachary Landry-7th

Victor Paredez-7th

Victoria (Tori) Stutts-7th

After the all math dust settled, Reagan Carr – took 11th place in calculator and Victor Paredez – took 16th place in mathematics! Once again, we want to take the time to congratulate our competitive students and thank Mrs. Paredez for a very successful mathematics competition season.

Tri-Con Inc. and ExxonMobil Make a Difference in Kountze

The Kountze Middle School was once again rewarded with a \$500

grant for use in STEM classes and programs at KMS. Exxon Mobil has partnered with Tri-Con Inc and Exxpress Mart, in order to help improve the core knowledge and performance of science and math programs throughout the country. Science, technology, engineering and mathematics, or “STEM” as it is referred to now days, can encompass a wide range of classes and lessons in most of our classrooms. It is important to invest in products or programs that will help students better understand that science and math are incorporated in today’s business world and America’s higher education institutions. Again, we want to thank the sponsors of the Educational Alliance and Tri-Con for presenting us with the official check. We look forward to adding educational assets to our programs and are very grateful for the contributions made by community businesses.
