

# Using iStation

Istation will only work if the students have the istation app installed on the device they are using. Now the software is Free to download which they can find here. <https://www.istation.com/Support>

Good news is the app is available on a ton of devices already. Another thing to note is in order to login they MUST go through Classlink on their device. Classlink acts as a verification/security of that students info so that when they click on istation in Classlink it will sign in, verify, redirect to the app on the device and login as them. I understand this may seem way complicated than it needs to be but they cannot skip straight to istation and try logging in from there. They will be skipping the verification set in place with Classlink.
