

More on Safety and Security

Dighton schools will be participating in an evacuation drill some time during the day on March 21, 2019. The scenario for the drill primarily focus on the junior/senior high building. We will “shelter in place” at the elementary. We will conduct a different type of evacuation drill for the elementary next fall.

This drill will serve as our active shooter drill. We will be partnering with Lane County Law Enforcement and Lane County Emergency Management to conduct the drill.

The purpose of the drill is assess our ability to evacuate our school safely and efficiently while relocating to our designated location. The evacuation location for the secondary building is the Christian Church.

Please note this is a drill. We look forward to working with our local agencies during this drill to ensure the safety of our school children. We want this to be as authentic as possible without causing undue alarm to our patrons.

I appreciate the efforts of our Law Enforcement and Emergency Management to ensure the safety of all citizens. I also appreciate the continued support of the community as we endeavor to provide quality educational opportunities for each student.

Respectfully,
Dr. Arnberger
