

Superintendent Report
July 24, 2017

It is hard to believe that summer is already past its halfway mark. All summer activities are moving right along and the cleaning process is doing well. The addition of our new cleaning process at WES is doing well. I am very pleased with this process and am excited to see how this will compare to WMS and WHS this fall. If it is positive, which I believe it will be, I could see us moving in that direction once all our other chemicals are used up.

Ending a school and beginning a school year is always a busy time in the district office. Mrs. Bousman is working hard to finalize everything for the past school year while beginning a new one. Budget workshop has been scheduled for us to attend. We will be given guidance there for any changes we must make in this process.

The accreditation model (KESA) is now in place for the state. We have made our assessment of the district and will be moving forward with our plans. There will be presentations to the Board throughout the school year from the buildings. I believe this is an exciting time for Kansas and education. Future looks good!

If you have not noticed outside of the district office, the tree has been cut down since a storm had split the tree and dropped a big limb. We are missing our shade tree this summer.
