

Superintendent Report
August 21, 2017

All staff has started working this week. This first week is always challenging getting everything ready for the reason we are here. Students are the main focus and I can assure everyone we will be ready. I am excited for the beginning of the year with students. Staff has their classrooms ready for students to enter. The smiling faces are always a joy to see.

The district calendar will be updated as events change or are added. Anyone can look at this calendar and make changes into their own calendar. It is a great way to keep up to date with the happenings within the school system.

Activities practices began Monday. Student athletes have been roaming the halls and are excited to be a part of our athletic teams. I have been impressed with our students in how they have shown effort towards their respective sport. Many of the other school sponsored activities will be begin later in the school year. Always an exciting time for our students.

All summer projects have been completed with the exception of the track. As the Board is aware, we have been in contact with the company and this project will be discussed at a future meeting. It is planned to be completed next summer.

New software programs for classrooms, subs etc. are being taught to those needing the information. Trainings are always difficult until the user actually gets to use the program. That is when one really learns the program. Once again, the staff has been learning the information and will be ready to put it to use when needed.

Great school is ready to begin!
