

Superintendent Report
June 26, 2017

Summer projects are moving right along. The cleaning crew are on schedule at WES and just a about one day behind at WMS and WHS. Nothing to be concerned about since we started the staff at least two days later than last summer.

Some of the new staff have begun working and are getting items in place for next school year. Always good to see new faces join us. We have a good school system and we continue to get better each year. We are finalizing all staffing this week that we know have left us. It can always change.

Summer school is moving right along. Our summer school is drivers education and special education. Everything is going well. We have great people leading these classroom/driving activities. Very proud of the accomplishments they have shown to date.

The Supreme Court will hear arguments on July 18 with respect to the new funding formula. There are many different groups talking about if the money is enough to satisfy the courts or not. What I do know is we are to remain open come July 1 and continue with school as usual. The courts will then decide if the money is enough.
