

Superintendent Report
March 26, 2018

Each school year moves very quickly and before we know it the second semester comes to a close. With the closing of a school year, comes more state testing. These tests will begin very shortly and conclude very quickly. The state has cut back on the amount of testing we must perform which is good for our students and staff. Results will be compiled once they are finished.

Since the latest school finance report is out, our Legislature is now faced with getting a new funding mechanism in place by April 30th. Once this is in place it will be sent to the Kansas Supreme Court to render its judgement. We may be facing another year of needing to a quick turnaround time for completing the budget. Last year our office had very few days to complete the budget and send to the newspaper for publishing. All budgets must be certified by August 25th in the county clerk's office. We will know more about our budget in May what possibilities could be. The court has said they will make their decision in June.
