1. Kansas Can: We went to a workshop last week on the new Kansas Can Initiative. There are a lot of great things that we can do with this to really help our kids out as they get college and career ready. We will be working on these things throughout the school year with our teachers and site council.
2. Career Cruising: We are in the start-up phase of this new program. We will be going to a training next week and will begin incorporating it into our classes this semester. This is a great program that helps students match their interests with career opportunities.
3. ACT Aspire Testing: We will be testing all of our Freshman and Sophomores again this fall. We will be testing them in English, Reading, Writing, Science and Math.
