

Superintendent Report
September 26, 2016

The Supreme court of Kansas has heard the case from the State and from the Plaintiff in regards to school funding. The court will now deliberate and render their decision. Some believe the court will make their decision before the elections while others believe the court will let us know in December or later. Whatever the outcome is, we will continue to work with our students and keep the focus on them. They are the reason we are here!

The schools are running very smooth right now. We are almost finished with the first quarter and improvement is noticeable in many areas. Student behavior is going very well and most importantly, student achievement with teacher instruction continues to get better. Watching how our staff continues to work with our students is awesome. The patience the staff has is unbelievable. I must also say we have fabulous students as well. Our jobs are much easier because of the community support and how well our students come to learn each day of school.

Parent/teacher conferences were held September 21, and 22nd. As usual, WES has great attendance and WMS and WHS are very spotty. We still believe in these conferences and the interactions our staff have with parents is crucial to communication and student success. In the spring we only hold conferences at WES.

Kansas University honors our top scholastic students every year. This event is on October 12th and will be held at Anderson County High School. This is a great event they hold each year for our students.
