

WJRC Directors Report for March BOE Meeting

WJRC just finished adding new dugouts to the recently finished ball field on the north side of the Saddle Club complex. The completion of the dugouts will add an already attractive feature to the new field. The addition of the fourth field is essential with the increasing number of rec and competitive games being played at the complex.

WJRC Staff will now assume the responsibility of preparing the ball fields for WHS baseball/softball games this spring. With WJRC now having full time staff present, it will make it easier for WJRC to work the fields. We will order materials and track what is used to prepare/maintain the fields. At the completion of the season, we will invoice the school for the total amount, along with the list of the items used.

Our recreation youth soccer league will begin at the end of March. We will be playing at the soccer fields across from the elementary school. WJRC youth baseball/softball registrations just ended and will begin games during the middle may.
