

Mullin ISD  
2019-2020  
Annual Progress SHAC Report

The Mullin ISD Student Health Advisory Council (SHAC) is a group of individuals representing segments of the community and school district, which provides advice to the MISD on coordinated school health programming and its impact on student health and learning. SHAC can provide oversight on coordinated school health programs to include nutrition services, health services, healthy and safe school environments, counseling and mental health services, staff wellness promotion, parent and community involvement, physical education, and health education.

SHAC met on November 7th and discussed strategies to increase parental involvement, ways to involve parents in a discussion about risky behaviors and warning signs of suicide risk, behavioral concerns, trauma-informed care policy, and mental health training for teachers.

SHAC met on April 29th and reviewed the new SHAC google drive folder that includes local policy, legal policy, and a template for next year's annual progress report. This meeting also served as a time to discuss roles and responsibilities. New members were brought on board to include parents Cory Baker, Jared Romero, Ciara Sims, Amanda Leonard, Carey Holland, and school personnel Amanda Burkett, Brent Williamson, Kathryn Caulkins, Marki VanZandt, and Denise Castillo. Plans to reopen the school for the 20/21 school year include mandatory-monitored handwashing times, first-day COVID-19 prevention and awareness meeting with all students, inservice training over COVID-19 prevention and awareness, classroom seating arrangements to include social distancing, mandatory-monitored hand sanitizer application schedule, and potentially check everyone's temperature before accessing school.

Plans for next year include fifth and sixth-grade health class taught by Brent Williamson, a spring and fall plant sale conducted by Gage Taylor and Denise Castillo, fitness gram implemented by Brent Williamson, e-cigarette prevention, mental health awareness for employees via SafeSchools training, and mental health awareness via counselors and Jennifer Jarek from Region 12.
