

Levelland ISD Procedures for Head Lice:

- Levelland ISD will contact parents of a student identified with having head lice.
- If the child has nits, or eggs, then the student will be able to remain at the school until the end of the day. The parent, however, will have the option of picking up the child or leaving him/her at school.
- If live lice are present then the school may require the parent to pick up their child. The child will be readmitted to school after treatment and a clean examination by the appropriate school personnel.
- In either situation the parents will be given information from the school on how to treat the lice.
