

SchoolMessenger Notification Service

Harper ISD has contracted with West Corporation to provide SchoolMessenger notification services for parental outreach, emergency broadcasts, student attendance alerts and other communications for education.

The SchoolMessenger system is designed to automatically notify parents for reasons that impact the safety and academic performance of students. SchoolMessenger will extend the district's existing community outreach efforts and emergency preparedness procedures, as well as inform parents of upcoming school events such as statewide testing and parent meetings. As a comprehensive communication tool, SchoolMessenger will contribute to the district's involvement initiatives, allowing the district to engage the broader educational community about a wide range of topics affecting students' academic success.

SchoolMessenger notifications will *not* replace current school communication methods. Principals will still be accessible for in-person visits and will continue to communicate via current methods including paper notices. The district's acquisition of West's SchoolMessenger system is intended to extend its commitment to remain personally connected with parents by offering additional and timely communications.
