

Summer Website, Phone and Skyward Outages

Posted: 3:18 p.m. on May 31, 2018

Summer web, phone and Skyward changes and outages are scheduled for the Little Cypress-Mauriceville District.

June 6

District, campus, and department websites will be updated to comply with the ADA responsive design regulations. This will start around 7:00-7:30 a.m. with the District site, then campus and department websites will follow one at a time until complete. Websites will be down while they are being migrated.

June 27

The District telephone system is outdated and must be replaced. There will be intermittent outages on that day.

July 12 and 13

A major Skyward Update will be implemented. According to Skyward, the system will be down during most of the day on the 12th, and there may be intermittent outages on the 13th, if it is necessary to make changes to the system.

At some point during the summer, LCM High School will have an outage to reconnect the permanent data/phone services in the main hall, which were rerouted because of construction. A date for that has not been set, as it is dependent on progress in other areas at the HS.
