February 1, 2018

To our dear LCM family,

Since most of our normal "spaces" were flooded when Harvey visited us way too long, our community was suddenly forced to take action. We become more creative than ever before to make space to accomplish educating our students.

Due to having limited cold storage space, equipment and dining areas, the Child Nutrition staff quickly took action to make meals in a sack...thousands of them. As much nutrition as possible, was packed into those sacks. Then they were sent on in love with prayers for strength and health for families to recover from the aftermath of this awful storm.

USDA, in conjunction with TDA, elected to feed our children free meals and gave waivers that allow us to serve in these creative ways. We are so grateful for their support, calls and visits during this difficult season. We will be able to serve meals free to our students up through March 31st at least.

Those meals in a sack have sustained us all these months but we are eagerly looking forward to the day we will cook for our school district again!

Sincerely,

Suzanne Magee
