

Kopperl ISD Cafeteria – Ethics Policy

Ethics: Ethics can be defined as the principles of conduct governing and guiding an individual or a group.

FOOD TAKEN FROM SCHOOLS

The School Nutrition Programs (SNP) are designed and funded to serve children in the school. No food, not even leftover food (including milk), is to be purchased and taken from the premises. In addition to the food being misused, other issues, such as sanitation and safe food handling, become major concerns when food or leftovers are removed from the premises. Refer to Section 19, Other Operational Issues, regarding the donation of leftover foods.
