Internet Know How

It's NOT smart to:

- Download copyrighted material (software, movies, music) from file sharing networks (it's also illegal).
- Click "unsubscribe" in a spam email. That just lets the spammer know you're a real person.
- To believe an email that says your account has been messed with. It may be a spoof (not really from who it says it is from).
- To buy pirated software. They can contain viruses.
- To fall for an Internet scam. If it seems too good to be true, it probably is. Be cautious.
- To meet up with people you talked to on the Internet but don't talk to and see in your everyday life. Tell an adult about it first.
- to believe everything you see on the internet. Some things aren't as real as they seem or say they are.
