

KSHSAA Recommended Concussion & Head Injury Information Release Form

This form must be signed by all student athletes in grades 7-12 and parent/guardians before the student participates in any athletic or spirit practice or contest each school year.

A concussion is a brain injury and all brain injuries are serious. They are caused by a bump, blow, or jolt to the head, or by a blow to another part of the body with the force transmitted to the head. They can range from mild to severe and can disrupt the way the brain normally works. Even though most concussions are mild, **all concussions are potentially serious and may result in complications including prolonged brain damage and death if not recognized and managed properly.** In other words, even a “ding” or a bump on the head can be serious. You can’t see a concussion and most sports concussions occur without loss of consciousness. Signs and symptoms of concussion may show up right after the injury or can take hours or days to fully appear. If your child reports any symptoms of concussion, or if you notice the symptoms or signs of concussion yourself, seek medical attention right away.

Symptoms may include one or more of the following:

- Headaches
- “Pressure in head”
- Nausea or vomiting
- Neck pain
- Balance problems or dizziness
- Blurred, double, or fuzzy vision
- Sensitivity to light or noise
- Feeling sluggish or slowed down
- Feeling foggy or groggy
- Drowsiness
- Change in sleep patterns
- Amnesia
- “Don’t feel right”
- Fatigue or low energy
- Sadness
- Nervousness or anxiety
- Irritability
- More emotional
- Confusion
- Concentration or memory problems (forgetting game plays)
- Repeating the same question/comment

Signs observed by teammates, parents, and coaches include:

- Appears dazed
- Vacant facial expression
- Confused about assignment
- Forgets plays
- Is unsure of game, score, or opponent
- Moves clumsily or displays incoordination
- Answers questions slowly
- Slurred speech
- Shows behavior or personality changes
- Can’t recall events prior to hit
- Seizures or convulsions
- Any changes in typical behavior or personality
- Loses consciousness

*The signed, completed forms must be turned in to the school's Athletic Department
before the first day of practice.*

What can happen if my child keeps on playing with a concussion or returns too soon?

Athletes with the signs and symptoms of concussion should be removed from play immediately. Continuing to play with the signs and symptoms of a concussion leaves the young athlete especially vulnerable to greater injury. There is an increased risk of significant damage from a concussion for a period of time after that concussion occurs, particularly if the athlete suffers another concussion before completely recovering from the first one (second impact syndrome). This can lead to prolonged recovery, or even to severe brain swelling with devastating and even fatal consequences. It is well known that adolescent or teenage athlete will often under report symptoms of injuries. And concussions are no different. As a result, education of administrators, coaches, parents and students is the key for student-athlete's safety.

If you think your child has suffered a concussion:

Any athlete even suspected of suffering a concussion should be removed from the game or practice immediately. No athlete may return to activity after an apparent head injury or concussion, regardless of how mild it seems or how quickly symptoms clear, without written medical clearance from a Medical Doctor (MD) or Doctor of Osteopathic Medicine (DO). Close observation of the athlete should continue for several hours. You should also inform your child's coach if you think that your child may have a concussion Remember it is better to miss one game than miss the whole season. **When in doubt, the athlete sits out!**

Return to Practice and Competition:

The Kansas School Sports Head Injury Prevention Act provides that if an athlete suffers, or is suspected of having suffered, a concussion or head injury during a competition or practice, the athlete must be immediately removed from the competition or practice and cannot return to practice or competition until a Health Care Professional has evaluated the athlete and provided a written authorization to return to practice and competition. The KSHSAA recommends that an athlete not return to practice or competition the same day the athlete suffers or is suspected of suffering a concussion. The KSHSAA also recommends that an athlete's return to practice and competition should follow a graduated protocol under the supervision of the health care provider (MD or DO).

For current and up-to-date information on concussions you can go to:

***The signed, completed forms must be turned in to the school's Athletic Department
before the first day of practice.***

By signing below, I acknowledge having received the KSHSAA recommended information about concussion and head injuries.

Student-athlete Name Printed Student-athlete Signature Date Grade

Parent or Legal Guardian Name Printed Parent or Legal Guardian Signature Date Grade

Sports Risk Assessment

We the undersigned parent(s) or guardian(s) of _____ have been advised and understand that participating in sports carries with it the risk of injury. These injuries may include (but are not limited to) the following: lacerations, bruises, sprains, strains, broken bones, knee injuries, paralysis (partial and in some cases complete paralysis), and in some cases death.

Having been so advised, it is our intent to grant permission for our son/daughter to participate in interscholastic sports competition for the school year identified at the top of this form. Note: Both parent(s)/guardian(s) should sign and date below.

Mother/guardian signature Date Relationship to student

Father/guardian signature Date Relationship to student

I, the undersigned player, have been advised and understand that participating in sports carries with it the risk of injury. These injuries may include (but are not limited to) the following: lacerations, abrasions, bruises, sprains, strains, knee injuries, broken bones, paralysis (partial and in some cases complete paralysis), and in some cases death. Having been so advised, it is my intent to participate in interscholastic sports for the school year identified at the top of this form.
