

Parent Engagement Action Report for ACSIP's - 9-30-2014

BERRYVILLE SCHOOL DISTRICT
902 West Trimble, Berryville, AR 72616

Action Report

For: Parental Engagement.

Generated on September 30, 2014

BERRYVILLE ELEMENTARY SCHOOL

Action Type: Parental Engagement

Priority 1: Literacy

Goal: All students will improve in reading by using the components of comprehensive literacy to promote their phonemic awareness, phonics, fluency, vocabulary and comprehension.

Priority 2: Mathematics

Goal: All students will improve in the mathematics skills of Numbers and Operations, Data Analysis and Probability, and Measurement by applying standards based math curriculum and Cognitive Guided Instruction.

Priority 3: Wellness

Goal: Create an environment where students will show an increase in health and wellness.

Priority 5: Parental Involvement

Goal: To further the development of an effective learning community and support a climate conducive to performance excellence reducing the achievement gap between all ESEA identified sub-groups. Berryville Elementary School will meet or exceed its Annual Measureable Objectives in the following areas: a. Literacy: All Students Group Performance 87.13% and TAGG Group Performance 84%; b. Math: All Students Group Performance 92.65% and TAGG Group Performance 89.43%.

BERRYVILLE HIGH SCHOOL

Action Type: Parental Engagement

Priority 1: Literacy

Goal: All students will improve in reading comprehension and written expression with additional attention to open-response passages.

Priority 2: Mathematics

Goal: All students will improve in mathematics skills and answering constructed/open response math questions.

Priority 3: Wellness

Goal: Create an environment where students will show an increase in health and wellness based on the BMI results and the SHI assessments.

BERRYVILLE INTERMEDIATE

Action Type: Parental Engagement

Priority 2: Mathematics

Goal: All students will improve in mathematics skills.

Priority 3: Wellness

Goal: Create an environment where students will show an increase in health and wellness.

Priority 5: Parental Involvement

Goal: To further the development of an effective learning community and support a climate conducive to performance excellence reducing the achievement gap between all ESEA identified sub-groups. Berryville Intermediate School will meet or exceed its Annual Measureable Objectives in the following areas: a. Literacy: All Students Group Performance 87.13% and TAGG Group Performance 84%; b. Math: All Students Group Performance 92.65% and TAGG Group Performance 89.43%.

BERRYVILLE MIDDLE SCHOOL

Action Type: Parental Engagement

Priority 1: Literacy

Goal: All students will improve in Reading Comprehension and Written Expression with additional attention to practical, literary and content reading passages and content and style writing passages

Priority 2: Math

Goal: All students will improve in Mathematics skills and responding to constructed response questions

Priority 3: Wellness

Goal: Create an environment where students will show an increase in health and wellness based on the BMI results and the SHI assessments.

BERRYVILLE SCHOOL DISTRICT

Action Type: Parental Engagement

Priority 1: Safe and Drug Free Schools

Goal: Create a Safe and Drug-free environment where students can learn and succeed.

- Priority 2:** Provide administrative support to building level programs.
Goal: Provide support for building level improvement programs.
- Priority 4:** Wellness
Goal: Create an environment where students will show an increase in health and wellness based on the BMI results and the SHI assessments.
- Priority 5:** ELL- English Language Learners
Goal: The District will support efforts of the schools to improve the literacy of all ELL students.
- Priority 6:** SPED
Goal: Provide comprehensive coordinated early intervening services to white K-5 students, specifically grades 3-5 students identified as needing SPED services.

BERRYVILLE ELEMENTARY SCHOOL

Action Report

For: Parental Engagement.

Action Type: Parental Engagement

Priority 1: Improving Literacy

1. NOTE: BERRYVILLE ELEMENTARY is a feeder school to the intermediate building which houses 3-5 grades. COMPREHENSIVE NEEDS ASSESSMENT: We formed ACSIP Leadership Teams and analyzed the test scores from the 2011 administration of the 3rd grade Augmented Benchmark, the 1st and 2nd grade ITBS Exams. We examined the results for both the combined population and EACH subpopulation. We heard a report from our Formative Assessment Team who showed written evidence documenting our main areas of weakness. (J-1) In addition, we studied our attendance, disciplinary, and achievement data over the past three years. We aggregated and disaggregated all the data for the purpose of determining student learning and behavioral needs. We looked at the trend data from NORMES and TLI in order to better identify the areas of need and help align classroom instruction with the CCSS (Common Core State Standards), in literacy. We examined our routines, customs, norms and expectations in order to dig deeper for the root cause why more of our students are not achieving to their full potential. Our supporting data statements show the discrepancies in achievement, among our various populations. We are modifying our curriculum, instruction, assessment and professional development practices to better meet the needs of our populations. Our data analysis led us to prioritize these areas: Special Education literacy, reading as well as writing, analysis and use of literary devices with LEP students, analysis and use of literary devices and writing introductions for the general population of students. We will select interventions and use funds, that put us in the best position to address these needs. In addition, we meet in teams weekly and as an entire staff as needed so that we can review formative, real time classroom performance data, for the purpose of making decisions regarding direction, and focus of our classroom instruction. We will use TESS (Teacher Evaluation Support System) as a tool to improve student learning and instruction.

Intervention: Comprehensive Literacy Approach to Reading Comprehension				
Scientific Based Research: Citations: Johnson, P. (2010). Catching Readers Before They Fall. Portland, MA: Stenhouse Publishers. Dorn, L. & Soffas, C. (2012). Interventions that Work. Boston, MA: Pearson Education Inc. Pinnell, G. & Fountas, I. (2009). When Readers Struggle. Portsmouth, NH: Heinemann. Anderson, J. (2007). Everyday Editing. Stenhouse Publishers.				
Actions	Person Responsible	Timeline	Resources	Source of Funds
Students in K-2 will participate in the Book-It incentive reading program. Action Type: Parental Engagement	Leslie Hopkins, 1st Grade Teacher Kathy Kiraly, Paraprofessional	Start: 07/01/2014 End: 06/30/2015	<ul style="list-style-type: none"> Public Library School Library Teachers 	ACTION BUDGET: \$
The school will meet all requirements of Act 397 of 2009 to include: H1-a) informational packets (given to parents in English and Spanish during orientation and open house or as they enroll), H1-b)parent involvement meetings (handbook committee, ACSIP committee, volunteer program), H1-c)volunteer resource book (kept by counselor), H1-d) school's process for resolving parental concerns in handbook, H1-e) seminars to inform the parents of high school students about how to be involved in decision, H1-f) enable formation of PTA/PTO (PTA meetings the second Tuesday of every month).	Elementary Counselor	Start: 07/01/2014 End: 06/30/2015	<ul style="list-style-type: none"> Administrative Staff Community Leaders 	ACTION BUDGET: \$

H1-g) certified parent facilitator (Elementary Counselor) H1-h) two parent /teacher conferences (Sept. 23 and 25 March 10 and 12), H1-i)provide instruction to a parent on how to incorporate developmentally appropriate learning activities in the home environment (Math and Literacy nights), H1-j) engage in other activities determined by the school to help a parent assist in his or her child's learning (HAC-Home Access Center, parent center in Library, Accelerated Reader, Science Fair, Communication logs). Action Type: Collaboration Action Type: Parental Engagement				
Develop AIP's for 2nd grade students who perform basic on the NRT, 1st grade students that perform basic or below basic on developmentally appropriate local assessments, and kindergarten students who score "not developed" in either oral or written communication on the Qualls. Teachers will analyze student strengths and deficiencies to build a flexible plan. Teachers will use standards-based supplemental and/or remedial strategies. Students will receive systematic and explicit instruction from highly qualified teachers until the child has reached grade level benchmarks in all essential levels. Formative assessments will provide data which will drive decision making in classroom instruction and interventions. Action Type: AIP/IRI Action Type: Parental Engagement	Kim Walker, 1st Grade Teacher	Start: 07/01/2014 End: 06/30/2015	<ul style="list-style-type: none"> Computers Performance Assessments Teachers 	<hr/> ACTION BUDGET: \$
Develop IRI's for students in kindergarten who score "not developed" in both oral and written communication on the Qualls, first grade students who score well below basic level on developmentally appropriate local assessments, and 2nd grade students who score below basic on the NRT. Teachers will analyze student strengths and deficiencies to build a flexible plan. Teachers will use standards-based supplemental and/or remedial strategies. Students will receive systematic and explicit instruction from highly qualified teachers until the child has reached grade level benchmarks in all essential levels. Formative assessments will provide data which will drive decision making in classroom instruction and interventions. Action Type: AIP/IRI Action Type: Parental Engagement	Tracie Morrell, Kindergarten Teacher	Start: 07/01/2014 End: 06/30/2015	<ul style="list-style-type: none"> Computers Performance Assessments Teachers 	<hr/> ACTION BUDGET: \$
A minimum of two hours training will be provided to the K-2 staff designed to enhance understanding of the ESL program.	Mary Ann Pharis, ESL Coordinator	Start: 07/01/2014 End: 06/30/2015	<ul style="list-style-type: none"> District Staff Outside Consultants 	<hr/> ACTION BUDGET: \$

Action Type: Alignment Action Type: Equity Action Type: Parental Engagement			<ul style="list-style-type: none"> Teachers 	
Organize Language Placement Assessment Committee (LPAC) to examine test data and teacher observation data. Meetings of the committee will expedite the placement and sharing of information on new students entering our district that qualify for ESL services. These meetings provide a time to discuss appropriate classroom and testing modification. Meetings are held with parents, counselors, administrators, and other certified staff to share information. Action Type: Collaboration Action Type: Parental Engagement Action Type: Special Education	Mary Ann Pharis, ESL Coordinator	Start: 07/01/2014 End: 06/30/2015	<ul style="list-style-type: none"> Teachers 	<hr/> ACTION BUDGET: \$
A certified teacher, our school counselor, will be hired as a parent facilitator. This facilitator will develop a volunteer resource book which will include a parent interest survey. An option for parents to designate how frequently they would like to participate in the volunteer program and opportunities for parents to assist from home will be included on the survey. The facilitator will be the liaison to develop the school-parent compacts to provide assistance to parents as needed. The facilitator will provide parents with informational packets that include the parental involvement plan, school calendar, and a system encouraging home-school connection, among other items. The facilitator will coordinate and integrate parent involvement programs and activities. The facilitator will oversee the parent center, which will include resources such as, but not limited to, parent magazines, brochures, videos and informational packets. (H1-A, H1-C, H1-G, H2-B, H2-D, H2-F) Action Type: Parental Engagement	Counselor	Start: 07/01/2014 End: 06/30/2015	<ul style="list-style-type: none"> Administrative Staff 	<hr/> ACTION BUDGET: \$
Parent involvement meetings, through orientation, literacy, math and science nights, and monthly local PTA meetings, will be held to discuss what students will be expected to learn, how student needs will be addressed, instructional practices, how to use Home Access Center (HAC) to monitor their child's progress how parents can assist to make a difference in his or her child's education, and relevant topics for parent education (H1-B, H1-F, H2-A) Action Type: Parental Engagement	Kelly Swofford, Principal	Start: 07/01/2014 End: 06/30/2015	<ul style="list-style-type: none"> Community Leaders Outside Consultants Teachers Title Teachers 	<hr/> ACTION BUDGET: \$

Priority 3: Students participating in the BMI activity show a need to improve their cardiovascular, muscular strength/endurance, and flexibility activity.

1. COMPREHENSIVE NEEDS ASSESSMENT: We formed ACSIP Leadership Teams and analyzed the BMI, free and reduced lunch data, and discipline data for kindergarten through second grade. We examined the results for all populations. We heard a report from our Formative Assessment Team who showed written evidence documenting our main areas of weakness. BMI (Body Mass Index): In 2012-2013, BMI results for Berryville Elementary showed that 14.2% of males and 17.4% of females participating were overweight, 14.8% males obese and 15.3% females obese. In 2013-2014, BMI results for Berryville Elementary showed that 22.1% of males and 16.8% of females participating were overweight. 24.2% of males were obese and 19.4% of females were obese. Conclusion: BMI data indicates an increase in obese and overweight students.
2. In 2011-2012 Free/Reduced: 58% of the student population. In 2012-2013, Free/Reduced: 60% of the student population. The data indicate that the Elementary is increasing in the percentage of free/reduced lunch students.
3. Elementary Attendance Rate: In 2012-2013 the attendance rate was: In 2013-2014 the attendance rate was:

Goal Create an environment where students will show an increase in health and wellness.

Benchmark Berryville Elementary will encourage strategies and activities that promote healthier lifestyles and meet the requirements of Act 1220 of 2003.

Intervention: Berryville Elementary will encourage strategies and activities that promote healthier lifestyles and meet the requirements of Act 1220 of 2003.

Priority 5:

Supporting Data:

Goal	To further the development of an effective learning community and support a climate conducive to performance excellence reducing the achievement gap between all ESEA identified sub-groups. Berryville Elementary School will meet or exceed its Annual Measureable Objectives in the following areas: a. Literacy: All Students Group Performance 87.13% and TAGG Group Performance 84%; b. Math: All Students Group Performance 92.65% and TAGG Group Performance 89.43%.
Benchmark	Parent involvement meetings will be held throughout the year to discuss what students will be expected to learn, how students needs will be addressed, how parents can assist to make a difference in his or her child's education and relevant topics for parent education. (H1-B, H1-F, H2-A)

Intervention: Parents will be provided with opportunities to learn about Berryville Elementary and the educational process. Parents will also be provided opportunities to engage with the student's learning process.

BERRYVILLE HIGH SCHOOL

Action Report

For: Parental Engagement.

Action Type: Parental Engagement

Priority 1: Improving Literacy

Supporting Data:

1. COMPREHENSIVE NEEDS ASSESSMENT: We formed ACSIP leadership teams and analyzed the test scores from the 2009 administration of the Grade 11 Literacy Exam, End of Course exams for mathematics classes, and the SAT 10 Exam. We examined the results for both the combined population and each subpopulation. We heard a report from our formative assessment team who showed written evidence documenting our main areas of weakness based on TLI data. In addition, we studied our graduation rates and attendance, disciplinary, and achievement data from the past three years. We aggregated and disaggregated all the data for the purpose of determining student learning and behavioral needs. We looked at the trend data from NORMES in order to better identify the areas of need and to help align classroom instruction with the curriculum frameworks in literacy and math. We examined our routines, customs, norms, and expectations in order to dig deeper for the root cause of why more of our students are not achieving their full potential. Our supporting data statements show the discrepancies in achievement among our various populations. We are modifying our curriculum, instruction, assessment, and professional development practices to better meet the needs of all our populations. Our data analysis led us to prioritize these areas: special education students, ESL students, economically disadvantaged students, and migrant students. We will select interventions and use funds that put us in the best position to address those needs. In addition, we will meet in teams semi-monthly and as a faculty monthly so that we can review formative, real-time classroom performance data for the purpose of making decisions regarding the direction and focus of our classroom instruction.

 The lowest identified areas for Hispanic were: Practical- Open Response
 The lowest identified areas for Caucasian were: Practical- Open Response
 The lowest identified areas for Econ. Disadvantaged students were: Practical- Open Response
 The lowest identified areas for LEP students were: Practical- Open Response

5. ACT: In 2008, the composite average score was 20.2 while reading was 21.8. In 2007, 71 students were tested. The average ACT English score was 20.1 and the average ACT reading score was 20.8. In 2006, 73 students were tested. The average ACT English score was 21.4 and the average ACT reading score was 23.0.
6. Graduation Rate: The 2008 graduation rate is unavailable at this time and will be placed in the data as soon as the state releases the figures. The 2007 graduation rate was 84.7. The 2006 graduation rate was 76.8.

Goal

All students will improve in reading comprehension and written expression with additional attention to open-response passages.

Intervention: Use of the Comprehensive Literacy Approach to reading and writing instruction.				
Scientific Based Research: Stephens, Elaine C. & Brown Jean E. A (2005) Handbook of Content Literacy Strategies: 125 Practical Reading and Writing Ideas.				
Actions	Person Responsible	Timeline	Resources	Source of Funds
The High School will meet all requirements of Act 307 of 2007 to include the following: 1) informational packets, 2) parent involvement meetings, 3) volunteer resource book, 4) school's process for resolving parental concerns in handbook, 5) seminars to inform the parents of high school students about how to be involved in decisions, 6) enable formation of PTA/PTO , 7) parent facilitator, 8) two parent/teacher conferences, 9) provide instruction to a parent on how to incorporate developmentally appropriate learning activities in the home environment,10) parent involvement and interaction with the Spring Art Show, 11) engage in other activities determined by the school to help a parent assist in his or her child's learning. Action Type: Parental Engagement	Lisa Thompson, Tiffany Atkinson, Paige Huffman, Boone Hooker	Start: 07/01/2014 End: 06/30/2015	<ul style="list-style-type: none"> District Staff 	<div>ACTION BUDGET:</div> <div>\$</div>

The school will develop school-parent compacts to meet the requirements of the ADE ACSIP Handbook. The school-parent compacts will be used to describe the school's responsibilities for high-quality curriculum, parents' responsibility in the child's learning, and address the importance of ongoing, open communication between faculty and parents. Action Type: Parental Engagement	Tiffany Atkinson	Start: 07/01/2014 End: 06/30/2015	<ul style="list-style-type: none"> Community Leaders Outside Consultants Teachers 	ACTION BUDGET: \$
There will be no fewer than two parent-teacher conferences per year. These will be held in the fall (after five weeks) and spring (after the first five weeks of the third quarter). Priority 2: Mathematics

1. COMPREHENSIVE NEEDS ASSESSMENT: We formed ACSIP leadership teams and analyzed the test scores from the 2009 administration of the Grade 11 Literacy Exam, End of Course exams for mathematics classes, and the SAT 10 Exam. We examined the results for both the combined population and each subpopulation. We heard a report from our formative assessment team who showed written evidence documenting our main areas of weakness based on TLI data. In addition, we studied our graduation rates and attendance, disciplinary, and achievement data from the past three years. We aggregated and disaggregated all the data for the purpose of determining student learning and behavioral needs. We looked at the trend data from NORMES in order to better identify the areas of need and to help align classroom instruction with the curriculum frameworks in literacy and math. We examined our routines, customs, norms, and expectations in order to dig deeper for the root cause of why more of our students are not achieving their full potential. Our supporting data statements show the discrepancies in achievement among our various populations. We are modifying our curriculum, instruction, assessment, and professional development practices to better meet the needs of all our populations. Our data analysis led us to prioritize these areas: special education students, ESL students, economically disadvantaged students, and migrant students. We will select interventions and use funds that put us in the best position to address those needs. In addition, we will meet in teams semi-monthly and as a faculty monthly so that we can review formative, real-time classroom performance data for the purpose of making decisions regarding the direction and focus of our classroom instruction.

Total Budget:				\$0

- Priority 3: Students participating in the BMI activity show a need to improve their cardiovascular, muscular strength/endurance, and flexibility activity.
- (Body Mass Index): In 2008-2009, BMI results for Berryville High School showed that 46% of males and 37.7% of females participating were either at risk or currently overweight. In 2007-08, BMI results for the Berryville High School showed that 48.6% of males and 33.6% of females participating were either at risk or currently overweight. In 2006-07, BMI results for the Berryville High School showed that 42.3% of males and 33.7% of females participating were either at risk or currently overweight.
 - SHI (School Health Index): The 2006-07 SHI revealed that health promotion for staff for all schools was low at 29% while school health services score for all schools was less than 80%. In the elementary area, nutrition services score was 69% while rating 74% in the middle school area. All low-scoring areas will be addressed in the District's Health and Wellness Plan.
- Supporting Data:
- Free/Reduced: In 2008-09, the Berryville High School had a free/reduced lunch rate of 41% with 512 students. In 2007-08, the Berryville High School had a free/reduced lunch rate of 40% with 524 students. In 2006-07, the Berryville High School had a free/reduced lunch rate of 40.5% with 528 students. These data indicate that the District is growing both in the number of students and in the number and percentage of free/reduced lunch students. These data, when compared to District data and to the Census Poverty data, also indicate an "under-reporting" of free/reduced lunch status at the high school level.
 - Graduation Rate: The 2010 graduation rate is unavailable at this time and will be placed in the data as soon as the state releases the figures. The 2009 graduation rate is 74.9%. The 2008 graduation rate is 74.22.

Goal Create an environment where students will show an increase in health and wellness based on the BMI results and the SHI assessments.

Benchmark The BMI and risk assessments will show a 10% increase in the health and wellness of all students.

Intervention: Berryville High School will encourage strategies and activities that promote healthier lifestyles and meet the requirements of Act 1220 of 2003.				
Scientific Based Research: Let's Get Physical- Promotion and Education Strategies by Dr. Hal Wechsler. http://www.fns.usda.gov/oane/menu/NNEC/Files/2003/LetsGetPhysical.pdf

BERRYVILLE INTERMEDIATE

Action Report

For: Parental Engagement.

Action Type: Parental Engagement

Priority 2: Improving Mathematics

1. **COMPREHENSIVE NEEDS ASSESSMENT:** We formed ACSIP Leadership Teams and analyzed the test scores from the 2011 administration of the third through fifth grade Augmented Benchmark and ITBS exams. We examined the results for both the combined population and EACH subpopulation. We heard a report from our Formative Assessment Team who showed written evidence documenting our main areas of weakness. In addition, we studied our attendance, disciplinary, and achievement data over the past three years. We disaggregated all the data for the purpose of determining student learning and behavioral needs. We looked at the trend data, from NORMES and TLI, in order to better identify the areas of need and help align classroom instruction with the curriculum frameworks in literacy and mathematics. We examined our routines, customs, norms, and expectations in order to dig deeper for the root cause why more of our students are not achieving to their full potential. Our supporting data statements show the discrepancies in achievement, among our various populations. We are modifying our curriculum, instruction, assessment, and professional development practices to better meet the needs of all our populations. Our data analysis led us to prioritize these areas: special education literacy gr. 3-5 and special education mathematics gr. 3-5. We will select interventions, and use funds, that put us in the best position to address these needs. In addition, we meet in PLC teams weekly and as an entire faculty as needed so that we can review formative, real time classroom performance data for the purpose of making decisions regarding the direction, and focus, of our classroom instruction. - Priority 3: Students participating in the BMI activity show a need to improve their cardiovascular, muscular strength/endurance, and flexibility activity.
- BMI (Body Mass Index): In 2010-2011, 4th Grade BMI results for the Berryville Intermediate School showed that 46.5% of males and 66.3% of females were either overweight or obese. We compared this percentage to the current 5th graders for 2011-2012 school year, which is our best source of comparison for the same group of students. Our findings were that 57.3% of males and 45.5% of females were either overweight or obese. In 2009-2010, BMI results for the Berryville Intermediate School showed that 28.7% of males and 34.7% of females were either overweight or obese. In, 2008-2009, BMI results for the Berryville Intermediate School showed that 39.5% of males and 36.5% of females were either overweight or obese. In 2007-08, BMI results for the Berryville Elementary showed that 40.2% of males and 37.7% of females participating were either at risk or currently overweight. In 2006-2007, BMI results for Berryville Elementary showed that 38.2% of males and 37.1% of females participating were either at risk or currently overweight. In 2005-06, BMI results for the Berryville Elementary showed that 39.5% of males and 37.8% of females participating were either at risk or currently overweight. In 2004-05, BMI results for the Berryville Elementary showed that 40.2% of males and 37.7% of females participating were either at risk or currently overweight.
 - A four-year longitudinal comparison of the 2007-2008, 2008-2009, 2009-2010, and 2010-2011 school year disciplinary reports for the Berryville Intermediate School revealed that: Disorderly Conduct reports were 41 (07-08), 46 (08-09), 47 (09-10), 61 (10-11); Insubordination reports were 8 (07-08), 10 (08-09), 27 (09-10), 41 (10-11); Bullying reports were 20 (07-08), 3 (08-09), 14 (09-10), 10 (10-11); Fighting reports were 12 (07-08), 5 (08-09), 5 (09-10), 5 (10-11); Dangerous Contraband reports were 2 (07-08), 1 (08-09), 1 (09-10), 3 (10-11); Destruction of
- Supporting Data:

School Property/Vandalism were 1 (07-09), 1 (08-09), 0 (09-10), 0 (10-11); and Truancy were 3 (07-08), 0 (08-09), 0 (09-10), 0 (10-11). Total discipline for 2009-2010 was 94, compared to 120 for 2010-2011, and increase of 26 incidences.

3. Free/Reduced: In 2010-2011, the Berryville Intermediate free/reduced lunch rate was 63%. In 2009-2010, the Berryville Intermediate free/reduced lunch rate was 63%. In 2008-2009, the Berryville Intermediate had a free/reduced lunch rate of 59.3%. In 2007-08, the Berryville Elementary had a free/reduced lunch rate of 58.1%. In 2006-07, the Berryville Elementary had a free/reduced lunch rate of 58.1%. In 2005-06, the Berryville Elementary had a free/reduced lunch rate of 57.8%. The data indicates that the Intermediate School is stable with a slight increase in the percentage of free/reduced lunch students.
4. Intermediate Attendance Rate: In 2010-2011, the attendance rate for the building was 94.93%. In 2009-2010, the attendance rate for the building was 94.88%. In 2008, the attendance rate for the building was 95.1%. In 2007, the attendance rate for the building was 95.2%. In 2006, attendance rate for the building was 95%.

Goal Create an environment where students will show an increase in health and wellness.

Benchmark The BMI will show a 5% increase in the healthy or underweight category. The attendance rate will remain at an acceptable compliance level. Total discipline referrals will decrease by ten incidents.

Intervention: Berryville Intermediate will encourage strategies and activities that promote healthier lifestyles and meet the requirements of Act 1220 of 2003.

Priority 5:

Supporting Data:

Goal To further the development of an effective learning community and support a climate conducive to performance excellence reducing the achievement gap between all ESEA identified sub-groups. Berryville Intermediate School will meet or exceed its Annual Measureable Objectives in the following areas: a. Literacy: All Students Group Performance 87.13% and TAGG Group Performance 84%; b. Math: All Students Group Performance 92.65% and TAGG Group Performance 89.43%.

Benchmark To meet or exceed the State Annual Measurable Objective (AMO) in Literacy and Mathematics for combined school population, as well as, all identified sub groups.

Intervention: Shared responsibility in decision-making. To comply with and implement the ADE 2014 Rules and Regulations for parental involvement and activities designed to increase communication between the school and home. Program Evaluation: Berryville Intermediate School will meet its Annual Measureable Objective in Literacy and Mathematics Baseline data will be established this year using TLI interim assessments in math and literacy. Assessment results will be monitored for effect. Comparisons will be made between interim assessment proficiency forecasts and actual PARCC results to measure program efficacy.

BERRYVILLE MIDDLE SCHOOL

Action Report

For: Parental Engagement.

Action Type: Parental Engagement

Priority 1: Improving Literacy

1. COMPREHENSIVE NEEDS ASSESSMENT We formed ACSIP Leadership Teams and analyzed the test scores from the 2009 administration of the 6-8 grade Augmented Benchmark and SAT 10 Exams. We examined the results for both the combined population and EACH subpopulation. We heard a report from our Formative Assessment Team who showed written evidence documenting our main areas of weakness. In addition, we studied our Attendance, Disciplinary, and Achievement Data over the past three years. Based on the data, we have identified areas of need to help align classroom instruction in literacy. Based on our analyses of the data, we have concluded that Special Education (SPED) students and English Language Learners (ELLs) reflect the greatest challenge in meeting future AYP.

Priority 2: Improving mathematics

1. COMPREHENSIVE NEEDS ASSESSMENT We formed ACSIP Leadership Teams and analyzed the test scores from the 2009 administration of the 6-8 grade Augmented Benchmark and SAT 10 Exams. We examined the results for both the combined population and EACH subpopulation. We heard a report from our Formative Assessment Team who showed written evidence documenting our main areas of weakness. In addition, we studied our Attendance, Disciplinary, and Achievement Data over the past three years. Based on the data, we have identified areas of need to help align classroom instruction in math. Based on our analyses of the data, we have concluded that Special Education (SPED) students and English Language Learners (ELLs) reflect the greatest challenge in meeting future AYP.

- Priority 3: Students participating in the BMI activity show a need to improve their cardiovascular, muscular strength/endurance, and flexibility.
1. COMPREHENSIVE NEEDS ASSESSMENT: We formed ACSIP Leadership Teams and analyzed the BMI, free and reduced lunch, discipline and attendance data. We heard a report from our Formative Assessment Team who showed written evidence documenting our main areas of weakness. In addition, we studied our Attendance, Disciplinary, and Achievement Data over the past three years. Based on the data, we have identified areas of need to help promote wellness within our student population.
 2. BMI (Body Mass Index): In 2007-08, BMI results for the Berryville Middle School showed that 43.9% of males and 39.3% of females participating were either at risk or currently overweight. In 2006-07, BMI results for the Berryville Middle School showed that 44% of males and 40.6% of females participating were either at risk or currently overweight. In 2005-06, BMI results for the Berryville Middle School showed that 44.6% of males and 38.4% of females participating were either at risk or currently overweight. These data indicate an increasing trend in the number of students who are either at-risk or currently overweight.
 3. SHI (School Health Index): The 2006-07 SHI revealed that health promotion for staff for all schools was low at 29% while school health services score for all schools was less than 80%. In the elementary area, nutrition services score was 69% while rating 74% in the middle school area. All low-scoring areas will be addressed in the District's Health and Wellness Plan.
 4. Free/Reduced: In 2007-08, the Berryville Middle School had a free/reduced lunch rate of 48% with 407 students. In 2006-07, the Berryville Middle School had a free/reduced lunch rate of 50% with 416 students. In 2005-06, the Berryville Middle School had a free/reduced lunch rate of 52.1% with 413 students. The data indicates that the Middle School student population and percentage of free/reduced lunch students seems to be dropping. However, poverty statistics do not agree with this drop so underreporting at this school seems to be indicated.
 5. Middle School Attendance Rate: In 2007-08, the attendance rate for the building was 95.5%. In 2006-07, the attendance rate from the building was 95.9%. In 2005-06, the attendance rate for the building was 93.9%.
- Supporting Data:

Goal Create an environment where students will show an increase in health and wellness based on the BMI results and the SHI assessments.

Benchmark The BMI and risk assessments will show a 10% increase in the health and wellness of all students.

Intervention: Berryville Middle School will encourage strategies and activities that promote healthier lifestyles and meet the requirements of Act 1220 of 2003.

BERRYVILLE SCHOOL DISTRICT

Action Report

For: Parental Engagement.

Action Type: Parental Engagement

- Priority 1: The District will support the safe and drug free schools initiative.
1. NEEDS ASSESSMENT, SAFE AND DRUG FREE: Our ACSIP Leadership Teams analyzed at each appropriate grade level the results from the administration of the ADPNA Survey, referrals for disorderly conduct, and referrals for student assaults. We examined the results from both the combined population and the subpopulations, and conducted data analysis to determine our main areas of need. In addition, we studied the three most recent years of Attendance, (Graduation Rate) Disciplinary, Formative and Summative Data across grade levels within our building, and compared combined population data with that from the subpopulations for the purpose of identifying learning and behavior needs of these students. We looked at trend data in order to better identify the specific areas of need and to help modify classroom instruction, curriculum, assessment, and professional development to meet the needs of all students and families. We examined our routines, customs, and expectations in order to identify areas for improvement. We continually evaluate and modify our Curriculum, Instruction, Assessment and Professional Development practices to better meet the needs of all our populations. Based on our Data Analysis we came to the conclusion that the following areas reflect our greatest need within this Priority: education about drug prevention especially alcohol and tobacco use. We will select Interventions and coordinate our local funds with state funding to address these areas.
- Supporting Data:

Goal Create a Safe and Drug-free environment where students can learn and succeed.

Benchmark There will be a 10% decrease in student referrals and drug use.

Intervention: Create a safe and drug-free environment by focusing on character-centered curriculum.				
Scientific Based Research: Voltz, D., Sims, M., Nelsom, B. (2010). Connecting teachers, students and standards: strategies for success in diverse and inclusive classrooms. ASCD, Alexandria, VA.				
Actions	Person Responsible	Timeline	Resources	Source of Funds
Parental awareness will broaden by use of newsletters, information sent via daily agenda books, monthly Parent Institute pamphlets, printed and broadcast announcements, radio spots, and other means necessary to inform all parents. All correspondence from the schools, including parent information and notification, will be in multiple languages to accommodate and include the diverse ethnicity of the district's families. Action Type: Parental Engagement	Dr. Doug Harris	Start: 07/01/2014 End: 06/30/2015	<ul style="list-style-type: none"> District Staff 	ACTION BUDGET: \$
Title I and/or Title VI-A funds will be used to purchase services and supplemental materials that will continue to complement the state-required effort of the schools to improve parental involvement. Parental involvement will increase by the implementation of the Parent/Guardian Involvement Plan which will	Dr. Doug Harris	Start: 07/01/2014 End: 06/30/2015	<ul style="list-style-type: none"> District Staff 	ACTION BUDGET: \$

include, but not limited to: responsible parenting resources, publishing lists of parents/guardians who attend all parent-teacher conferences scheduled by the school, parent/guardian center, scheduling regular "Parents Make the Difference" evenings, publishing a volunteer resource book, utilizing community resources to strengthen school programs, family practices, and student learning. Professional development will be offered to teachers OFF CONTRACT and/or above the 60 hours required by the state to strengthen the parental involvement program. Action Type: Alignment Action Type: Parental Engagement Action Type: Professional Development				
Total Budget:				\$0

Priority 2: Provide administrative support to building level programs.

Supporting Data: 1. NEEDS ASSESSMENT, PROVIDE ADMINISTRATIVE SUPPORT: Our ACSIP Leadership Teams analyzed at each appropriate grade level the results from all administrations of all assessments. We examined the results from both the combined population and the subpopulations, and conducted data analysis to determine our main areas of need. In addition, we studied the three most recent years of Attendance, (Graduation Rate) Disciplinary, Formative and Summative Data across grade levels both within and across all buildings, and compared combined population data with that from the subpopulations for the purpose of identifying learning and behavior needs of these students. We looked at trend data in order to better identify the specific areas of need and to help modify classroom instruction, curriculum, assessment, and professional development to meet the needs of all students and families. We examined our routines, customs, and expectations in order to identify areas for improvement. We continually evaluate and modify our Curriculum, Instruction, Assessment and Professional Development practices to better meet the needs of all our populations. Based on our Data Analysis we came to the conclusion that the following areas reflect our greatest need within this Priority: 11th grade literacy. We will select Interventions and coordinate our local funds with state funding to address these areas.

Goal Provide support for building level improvement programs.

Benchmark Intensive professional development and mentoring will be provided by the district to faculty in schools where students are scoring below AMO including subgroups. Success will be measured as schools show an annual increase in the number of students scoring from below proficient to proficient or above on all school-specified state benchmark, content, or end-of-course exams. See individual schools for the AMO growth rate.

Intervention: Provide administrative support.

1. The District will assure that all schools articulate and confirm the various steps each school implements to meet the needs of all students identified as "homeless" including the procedure for identification. 2. Title I funds will be increased if needed to meet the needs of all homeless students. BERRYVILLE'S TITLE I, PART A SET-ASIDE FORMULA IS LAST YEAR'S EXPENDITURE PER STUDENT MULTIPLIED BY THE ANTICIPATED NUMBER OF STUDENTS FOR THE CURRENT FUNDING YEAR. IF MORE FUNDS ARE NEEDED THROUGHOUT THE YEAR, THE HOMELESS LIASON WILL CONTACT THE FEDERAL PROGRAMS DIRECTOR TO REQUEST MORE FUNDS. 3. The District will use Title I funds to provide support to Homeless and welfare programs. Each school will have a procedure for identifying homeless students. Teachers will complete a homeless survey to	Apryl Harmon	Start: 07/01/2014 End: 06/30/2015	<ul style="list-style-type: none"> District Staff 	Title I - Materials & \$1000.00 Supplies: Title I - Purchased \$1000.00 Services: <hr/> ACTION BUDGET: \$2000

<p>better identify the needs of our students which is due to our Homeless Liaison Coordinator by October 15th. After that date, any teacher or staff member may report to the counselor or coordinator any changes in homeless status for any students. The Homeless Liaison is responsible for coordinating all efforts and storing documentation that proves the District is in compliance with the McKinney-Vento Homeless Education Act.</p> <p>Action Type: Equity Action Type: Parental Engagement</p>

supplemental services. The school will hold two enrollment periods to assure that all students have opportunities to participate. Funds will be allocated in the District ACSIP. Action Type: Collaboration Action Type: Parental Engagement				
Total Budget:				\$8004.25

- Priority 4: Students participating in the BMI activity show a need to improve their cardiovascular, muscular strength/endurance, and flexibility activity.
1. NEEDS ASSESSMENT, WELLNESS: Our ACSIP Leadership Teams analyzed at each appropriate grade level the results from the current administration of the BMI. We examined the results from both the combined population and the subpopulations, and conducted data analysis to determine our main areas of need. In addition, we studied the three most recent years of Attendance, (Graduation Rate) Disciplinary, Formative and Summative Data across grade levels within all buildings, and compared combined population data with that from the subpopulations for the purpose of identifying learning and behavior needs of these students. We looked at trend data in order to better identify the specific areas of need and to help modify classroom instruction, curriculum, assessment, and professional development to meet the needs of all students and families. We examined our routines, customs, and expectations in order to identify areas for improvement. We continually evaluate and modify our Curriculum, Instruction, Assessment and Professional Development practices to better meet the needs of all our populations. Based on our Data Analysis we came to the conclusion that the following areas reflect our greatest need within this Priority: at-risk or currently overweight. We will select Interventions and coordinate our local funds with state funding to address these areas.
- Supporting Data:

Goal Create an environment where students will show an increase in health and wellness based on the BMI results and the SHI assessments.

Benchmark The BMI and risk assessments will show a 10% increase in the health and wellness of all students.

Intervention: Berryville District will encourage strategies and activities that promote healthier lifestyles and meet the requirements of Act 1220 of 2003.				
Scientific Based Research: Calories in, calories out: food and exercise in public elementary schools, 2005. NCES.

Promote the reduction of time that students spend in sedentary activities such as watching television or playing video games. All correspondence from the schools, including parent information and notification, will be in multiple languages to accommodate and include the diverse ethnicity of the district's families. Action Type: Parental Engagement Action Type: Wellness	Dr. Doug Harris	Start: 07/01/2014 End: 06/30/2015	<ul style="list-style-type: none"> District Staff 	ACTION BUDGET: \$
Evaluate all wellness actions for effectiveness. Encourage development and implementation of family-oriented, community-based physical activity and wellness programs. PROGRAM EVALUATION: BMI (Body Mass Index): BMI results for the Berryville District for the past 3 years show an average of 40.8% of males and 37.4% of females participating were either at risk or currently overweight. An analysis of these data indicates a continuing trend in the high number of students who are either at-risk or currently overweight. The conclusion of the District is that appropriate support for activities and/or programs to increase the wellness and activity level of the student population is needed. Action Type: Collaboration Action Type: Parental Engagement Action Type: Program Evaluation Action Type: Wellness	Dr. Doug Harris	Start: 07/01/2014 End: 06/30/2015	<ul style="list-style-type: none"> Community Leaders District Staff 	ACTION BUDGET: \$

Priority 5: The District will coordinate local, state, and federal funding to support the efforts to meet the needs of all students identified as "English Language Learners".

Supporting Data: 1. **NEEDS ASSESSMENT:** Our ACSIP Leadership Teams analyzed at each grade level the test scores from the current administration of the Augmented Benchmark, EOC, Exit, SAT 10, and ELDA exams. We examined the results from both the combined population and the ELL subpopulation, and conducted data analysis to determine our main areas of need. In addition, we studied the three most recent years of Attendance, (Graduation Rate) Disciplinary, Formative and Summative Achievement Data across grade levels within our building, and compared combined population data with that from the ELL subpopulation for the purpose of identifying learning and behavior needs of this special subpopulation of students. We looked at trend data in order to better identify the specific areas of need and to help modify classroom instruction, curriculum, assessment, and professional development to meet the needs of ELL students and families. We examined our routines, customs, and expectations in order to identify areas for improvement. We continually evaluate and modify our Curriculum, Instruction, Assessment and Professional Development practices to better meet the needs of all our populations. Based on our Data Analysis we came to the conclusion that the following areas reflect our greatest need within the ELL Priority: Instructional tutoring, Verbal and written translations for students and parents, On-going monitoring of these special services. We will select Interventions and coordinate our local funds with state ELL funding to address these areas.

Goal The District will support efforts of the schools to improve the literacy of all ELL students.

Benchmark Professional development and mentoring will be provided by the district to all faculty members to increase the number of ESL endorsed teachers and the effectiveness of ESL instruction. Success will be measured by a 5% annual increase in the number of ELL students scoring proficient on the benchmark tests.

Intervention: Comprehensive ESL through content area instruction for balanced academic and language acquisition with primary and/or supplemental ELL services				
Scientific Based Research: Making Content Comprehensible for English Language Learners—SIOP Model SHELTERED INSTRUCTION— for Academic Achievement. http://www.misd.net/bilingual/ELL.pdf . 7/7/2011.				
Actions	Person Responsible	Timeline	Resources	Source of Funds
1. Parents of all ESL program students including LEP students will be informed and given written consent forms for inclusion into the ESL services. 2. Parent nights and other times will be used to inform ESL parents in strategies that will improve literacy. 3. All correspondence from the schools, including parent information and notification, will be in multiple languages to accommodate and include the diverse ethnicity of the district's families. Action Type: Parental Engagement	Mary Ann Pharis	Start: 07/01/2014 End: 06/30/2015	<ul style="list-style-type: none"> Community Leaders District Staff 	ACTION BUDGET: \$
Total Budget:				\$0

Priority 6: Special Education Trigger in disproportionality for having too many white students identified as other health impairment based on four consecutive years of over-representation.

Supporting Data: 1. **SPED Referrals:** The referrals to SPED were 2010=53, 2011-2012=51, 2012-13=42, and 2013-14=30 with a four year average of 44%. The district has reduced the number of SPED referrals and the has decreased the number of students placed under the "other health impairment" category which includes: 2010-11=13, 2011-12=14, 2012-13=7 and 2013-14=0.
2. **ADE SPED: Disproportionality:** 2010-11, 5.37% of white students identified as other health impairment, 2011-12 was 8.26%, 2012-13 was 4.6%, and 2013-14 was 6.15%.

Goal Provide comprehensive coordinated early intervening services to white K-5 students, specifically grades 3-5 students identified as needing SPED services.

Benchmark The district will provide comprehensive coordinated early intervening services to white grades k-5 students in the area of response to intervention to reduce by 5% the number of students who are at risk of referral to SPED services.

Intervention: The district will provide comprehensive coordinated early intervening services to white grades k-5 students in the area of response to intervention to reduce the number of students who are at risk of referral to SPED services.
