NUTRITIONAL AND DIETARY SUPPLEMENTS

The Board of Education realizes that nutritional supplements, although not banned or illegal, have been found to cause health complications in some individuals. Therefore, the Board of Education prohibits any school employee or officer of the school from prescribing, recommending, endorsing, or providing any nutritional or dietary supplements, vitamin, or non-prescription medication to students. Use of the afore mentioned products is best left to the discretion and supervision of parents and health care professionals.

This policy is not intended to prohibit the teaching of health education and proper nutrition.
