SUPPORT STAFF SELECTION AND ASSIGNMENT

Selection

It is the intention of the board of education that staff members be selected on a professional basis so that the most qualified person for the job will be selected and that selected staff members enter into a contract with the school district upon employment.

Nepotism Restriction

The board realizes, however, that it is unlawful for any person to be employed or put under contract if that person is related to a member of the board of education within the second degree of blood or marriage.

Assignment

The superintendent shall be responsible for the assignment of all staff members, but the principal may be asked to help with the assignments. Assignments shall be based on the requirements of each position and the qualifications of the person being considered for the position.
