

INTERNET FILTERING (REGULATION)

The Internet changes rapidly, making it impossible to filter all objectionable sites. Therefore, the staff role in supervising and monitoring student access to the Internet is critical. Additionally, staff members have the responsibility to monitor their own navigation on the Internet to avoid undesirable sites.

Filtering should be viewed as only one of a number of techniques used to manage student access to the Internet and encourage acceptable usage. Filtering should not be viewed as a foolproof approach to preventing access to inappropriate material and should be used in conjunction with:

- ✓ Educating students to be “*net smart*”;
- ✓ Using recognized Internet gateways as a searching tool and/or homepage for students, in order to facilitate access to appropriate material;
- ✓ Using “*Acceptable Use Agreements*”;
- ✓ Using behavior management practices for which Internet access privileges can be earned or lost; and
- ✓ Appropriate supervision, either in person and/or electronically.

The placement of filters on district computers/computer systems is viewed as an exercise of the board’s ability to determine educational suitability of all material used in the schools.

Filters may be utilized with district schools to (1) block pre-selected sites, (2) block by word, (3) block entire categories like chat and newsgroups, and (4) through a pre-selected list of approved sites.

Criteria for Filtering of Objectionable Sites

Anything that falls under at least one of the following categories shall be blocked. This list may be updated/modified as required.

Nudity / Pornography

- Prevailing U.S. standards for nudity (e.g., genitalia, female breasts)
