

Mobile Hotspot Checkout Priority Policies

Warren ISD has a limited number of mobile hotspots available. Because of this, we must be careful with our distribution of these devices. Below are our plans for distribution and reasoning for distribution.

Distribution of Devices Based on Economic Situations

Devices will be given priority to economically disadvantaged families (families currently receiving free or reduced lunch), and then given to other families at the Technology Department's discretion if supplies last. These will be given out primarily by request. A small amount of mobile hotspots will be available at each campus in the case of an immediate emergency related to COVID-19 forcing students to switch to At-Home Learning.

Reliable Internet Access

Devices will be given priority to families who did not claim to have reliable internet access in our Instructional Delivery Application given out earlier this year, in August.

Family Units

One Mobile Hotspot Device will be distributed per family unit. Each family unit was determined by the physical address of each student. Students who share physical addresses in our system will be considered family members.
