1. Successes:

Burke: So today I mentioned that we were going to start 8th grade graphing to my advanced class... I said it was called "y=mx formula and slope" A few kids rang out saying, "I can do that, I read it in my book!!" I was so excited for them and they made me look it up right then. Now, I am being asked to read it. I just wanted to share this and thought it might warm your hearts :D
Kids are well behaved today - not as many students gone.
