

Westside High School is a special place to work and learn. Our teachers are of the highest quality providing an excellent educational experience for each student. The staff truly care about our students and our community. The Westside community is often described as a family and an effective team that allows our students to learn in a caring environment free to explore their passions. We work hard to build relationships with all parents and students to help them feel at ease learning.

We have first class learning programs such as Agri Sciences (School Barn Facility coming in 2017), Air Force JROTC, EAST Lab, Business, Mobile Applications Development, Sculpture, Ceramics, Athletics and Fine Arts Programs. These activities help our students stay focused on learning and working toward skills that will help them in college or career. Parents, if you are looking for a close knit community school that will help push and prepare your student, the Westside High School is the place for you.

Please call me directly at 870-336-8020 if you would like to ask any questions or schedule a tour.

Michael J. Graham
Principal, Westside High School
