**App Task Challenge**

- Open Haiku Deck app. Login.

- Tap the + sign at the bottom to create a new presentation.

- Tap the image icon in the upper left to search for images that capture your project. Tap on an image from the search to see the preview at right. Select if you want text added to the background image. Click done.

- Add another slide by tapping the + sign at the lower right. Use the above visual to guide you through the rest of the app.

- When done, click on the share square to email to teacher. I would set the deck privacy to Private. Be sure to title your project.
