

Pink Eye (Conjunctivitis) Notice

Pink Eye has been reported in your student's classroom.

Symptoms are redness of the whites of one or both eyes, swelling of the eyelids and a thick discharge.

It is spread by contact with the discharges from the eyes or respiratory tract of the infected person, through contaminated fingers, clothing or other articles.

Infection responds to antibiotic treatment. Infected students will be **EXCLUDED** from school until on antibiotic for 24 hours.

Good handwashing and antibiotic treatment control spreading.
