Cool As A Cucumber 

As we start approaching Summer, our minds should turn to ways to stay cool and hydrated. Cucumbers are perfect for that! The inside of these refreshing vegetables are 20 degrees cooler than the outside air, making it the perfect treat in this Texas heat. They are also 95% water. Talk about hydration to the max! Cucumbers go so well with many common dips, such as ranch or hummus, or can be eaten on their own with a bit of salt and pepper. Regardless of how you like to eat them, they should be a large part of your diet this summer!

An option of Cereal & Toast, Fresh Fruit or Fruit Cup, and a Choice of Juice and Milk are also offered everyday.
