Analyzing your post secondary expenses. Include both expenses that you will incur as a senior as well as those throughout your college career. Your costs need to be reasonable estimates. You should include the following expenses, but do not limit yourself to just these:

College visits (gas cost, food etc..)

Application fees, Testing fees (SAT, ACT, etc), Housing deposits(or rent for apartment or house), bills(electricity, cell phone, insurance, etc..) and tuition, and textbooks or equipment if attending a trade school or going straight in to the workforce.

Analyze this budget.

How will you pay for these?

What savings do you have that can be used?
