SuperValve®

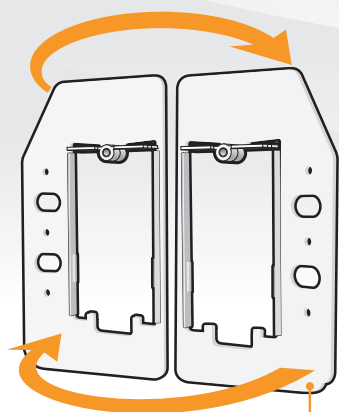

YOU DECIDE YOUR INSTALLATION

LEFT/RIGHT

UP/DOWN

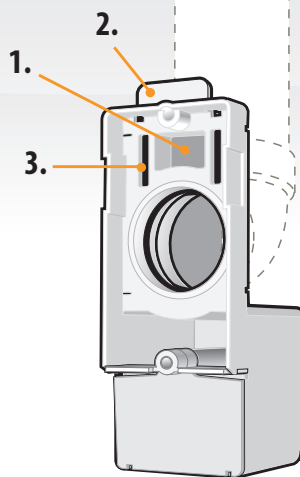

Reversible Flange

Unlike a traditional valve, the flange of this new valve is completely separate from the body, therefore it can either be placed on the left or right of the stud depending on your installation requirements.

NEW!

Larger lower flange for stronger installations.

Newly designed features

1. Recessed mini box accommodates valve plug when back plate is installed upside down.
2. Tab adds extra strength and stability to the retro-fit installation.
3. Low volt wire slots allow you to position the wire on either side of the pipe.

Vaculine® SuperValve®

WITH REVERSIBLE FLANGE & RETRO-FIT PLATE

Retro-Fit cover plate

included: Simply remove the Retro-Fit cover from the flange and discard the flange. Complete the electrical connections and snap on the cover plate. Slide box assembly through the drywall opening and secure the mounting box to the stud. Complete the assembly of the valve.

Lateral screw holes

built in for easy mounting to either side of the wall stud in a Retro-Fit installation.
