

WST-232 - Wireless Door/Window Sensor with external input - Honeywell/2GIG Compatible

For those installations where you simply cannot mount the magnet near the device, this sensor supports the use of an external contact. Still one of the smallest, and with both white and brown covers, one sensor will cover all your installation needs.

- Compatible with Honeywell 5800 wireless and 2GIG Go Control
- Field proven wireless technology
- Up to 0.625" in magnet gap
- External contact input
- Mounts with double sided tape or screw-in mounting bracket
- Case and wall tamper
- Dimensions only 1.0" x 2.625" x 0.25"
- Interchangeable brown case (included)
- Uses common CR2032 (3 V Lithium battery)
- 5 year battery life
- FCC and IC approved

SKU: WST-232
