

IDP-ACB Cabinet

Product Installation Document

PN 151404-L8:C 3/3/2022 ECN: 151770

1 Description

The IDP-ACB cabinet provides mounting space for two IDP or SK multi-modules.

NOTE: Installation and wiring of this device must be done in accordance with NFPA 72 and local ordinances.

2 Specifications

- Mounting type: surface mount
- Dimensions: 12.5" W x 15.25"H x 3.0"D
(31.8cm W x 38.7cm H x 7.6cm D)
- Weight: 6.25lbs (2.8kg)

3 Mounting

Mount the IDP-ACB using the four mounting holes as shown below in a dry, indoor location.

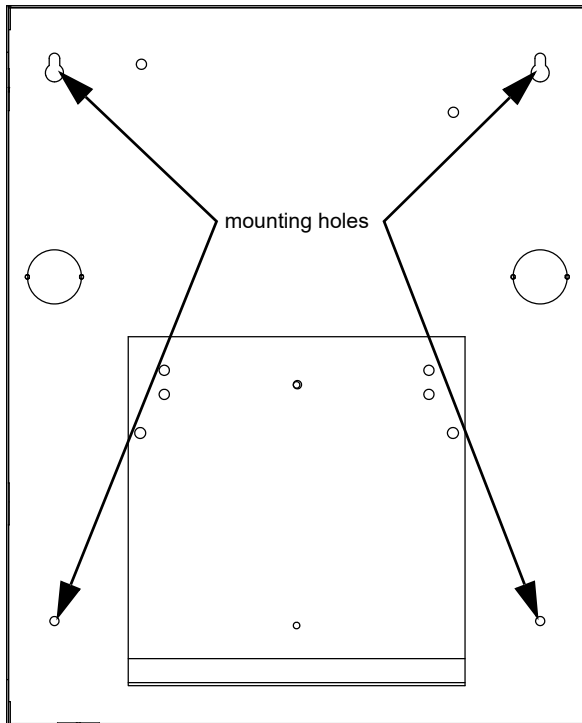

Figure 1 Mounting the IDP-ACB

4 Installing Modules

The mounting process for IDP or SK multi-modules is described below. All mounting hardware is included with the multi-modules.

1. Insert the tab of the module into the rear slot on the mounting plate.
2. Lay the back of the board against the two standoffs.
3. Skip to step 4 if you are mounting a second module into the IDP-ACB. If mounting only one module, secure the option module to the bracket with two 4-40 screws.
4. Address and wire the module as described in the compatible fire alarm control panel installation manual.
5. Install the 1.25" standoffs through the first module into the mounting plate.
6. Insert the tab of the second module into the front slot on the mounting plate.
7. Lay the back of the board against the two standoffs.
8. Secure with two 4-40 screws.
9. Address and wire the module as described in the compatible fire alarm control panel installation manual.
